Rectors of IUK, KRSU, AMI, OSU, ZSU

Republican Center for Quarantine and Particularly Dangerous Infections The Ministry of Health of the Kyrgyz Republic informs that in the world the situation remains unfavorable for cholera, malaria and other particularly dangerous infections. According to the World Health Organization, the most affected countries for cholera and malaria are: Haiti, the Dominican Republic, Bangladesh, Vietnam, Afghanistan, India, Indonesia, Cambodia, China, Iran, Iraq, Laos, Nepal, Pakistan, Philippines, Thailand, Papua New Guinea and African countries.

In accordance with the International Health Regulations (IHR 2005), in order to implement the decree of the Government of the Kyrgyz Republic No. 691 dated 23.10.2017 G. "On approval of the Rules for sanitary protection the territory of the Kyrgyz Republic and the Comprehensive plan of anti-epidemic sanitary protection of the territory of the Kyrgyz Republic import/introduction and spread of quarantine and especially dangerous infectious diseases that pose a danger to public health and public health, 2018-2022 years" and orders SCR highly dangerous foreign students, citizens arriving for a long time from disadvantaged countries for particularly dangerous infections, should be screened for cholera, malaria, and other particularly dangerous infections for preventive purposes, in the first days of arrival and upon returning from holidays, vacations. In case of suspicion/detection of particularly dangerous infections in each educational institution, develop a notification scheme and operational plans for conducting anti-epidemic measures.

In order to prevent the import/importation and secondary infection from imported cases and the mass spread of particularly dangerous diseases, it is necessary to conclude a contract (contract) with territorial health organizations for conducting laboratory tests of foreign citizens on the carrier of the pathogens of the above-mentioned infections.

Please provide information about the number of foreign citizens and the events held to our address by 20.03.2019.

Director stamped/signed Abdykarymov S.T.
