

**KYRGYZ STATE MEDICAL ACADEMY  
named after I.K. AKHUNBAEVA**

**Memo  
FOR STUDENTS  
Score-rating system of evaluation of knowledge**

**Bishkek – 2021**

## Dear student of the I.K. Akhunbaev KSMA !

This memo will help you familiarize yourself with the score-rating system (SRS) for assessing student knowledge to achieve the best learning outcomes.

**The score-rating system (SRS) of knowledge assessment** is a system of continuous accumulative quantitative assessment of the quality of students mastering the academic disciplines of the main educational program, which makes it possible to calculate the student's personal academic rating as the main indicator of educational success.

**The main goal of introducing the SRS knowledge assessment in the KSMA is to** develop fair mechanisms for the formation of an objective assessment of students by the cumulative score, taking into account the systematic work of studying disciplines during the semester.

### *SCORE-RATING SYSTEM MODEL*

For every studied discipline the departments develop the **Discipline Rating Plan (DRP)**, that determines an order of the subject study, points distribution by type of an academic load, schedule and forms for knowledge control ( *see Appendix 1* ).

The discipline is divided into **disciplinary modules (DM)**, every module represents a certain section of the studied discipline/subject. The number of DM cannot exceed two per semester.

In the process of studying DM, the student receives a score of a **current rating (CR)** and the score a **modular control (MC)**.

**Current rating (TR)** is a numerical indicator that displays the amount of points scored, evaluates all types of the classroom and extracurricular work of students in this disciplinary module before modular control. Evaluated by the 5 range scoring system ( *see Appendix 2* ).

The student accumulates points in the current rating by: theoretical quiz passing; case study and practical tasks completing; laboratory works and etc.

The current rating score for student independent work includes marks for other types of work determined by the departments, including disease case, protocols, forms writing, and etc.

Upon completion disciplinary module, all points accumulated on a 5-range scoring system are converted to the 100 - range scoring ( *see Appendix 3* ). At the same time, the maximum score is 80, and the **credit minimum** is 48 points on a 100-point scale which allows to take the modular control.

In the case the student participates in various activities to maintain an image of the Kyrgyz State Medical Academy (Olympiads, conferences, sport events, etc.) and the Dean Office provides supporting documents, it is considered that the student did not attend classes due to a respectful reason, and that student obtains maximum points (5 points) for one missed class in each subject for a specified period of time. If the number of missed classes is more than one, in order to obtain the credit minimum the student should improve the score.

If a student does not obtain the minimal credit score in the current rating the student is not allowed to pass MC. He must improve his rating (to get the missing points) by completing additional tasks, writing case studies, prescribing control recipes and other types of work according to the discipline program. At the same time, the repeated score should not exceed "4" (on the first attempt) and "3" (in other cases).

In case the student did not attend classes and lectures on the discipline, he is allowed to pass the MC only after liquidation of debts (reworking).

**During reworking practical classes for a respectful reason**, the student receives points of the current rating (according to the 5-point system).

**During reworking practical classes for a non-respectful reason**, the student receives a score not higher than 4 (on the first attempt) and not higher than 3 (in other cases).

**The modular control** can be conducted as: an oral questioning, testing, control work (written, laboratory), colloquium according to the department decision. The maximum score for MC is 20; credit minimum (threshold point) is 12 points.

In the case of receiving less than 12 points for MC, the student must retake the MC within two weeks.

If a student obtained the threshold score on the MC, but he wants to improve his rating, he is allowed to retake the MC once (within two weeks from the date of the MC before submitting a report to the Dean office).

If the student has not passed the previous MC, he can be allowed to take the next MC before the end of the semester.

The total score *the current rating* and *the modular control* is *the rating for the disciplinary module* ( $RDM=TR+MC$ ) and does not exceed 100 points (current rating - maximum 80 points and modular control - maximum 20 points).

**RDM is not calculated** until the student retakes the MC for the threshold score.

The arithmetic average value of all ratings for disciplinary modules in a semester composes *the semester rating*:  $SR = (RDM1 + RDM2) / 2$ .

From the semester score (SR) **penalty points** are deducted (maximum 10 points) for:

- skipping lectures and practical (seminars, laboratory) classes without **valid reason**:
  - up to 25% skipping up to 2 points is deducted,
  - up to 50% skipping up to 5 points are deducted,
  - for 50% or more skipping - SR is calculated only with the permission of the dean's office to eliminate academic debt;
- untimely MC passing (more than 14 days after the MC according to the discipline rating plan) - up to 2 points are deducted;
- up to 3 points are deducted in case non-compliance with the rules and norms regulated by local acts of the KSMA (including repeated violation of the uniform: lack of a medical coat, cap, phonendoscope).

Penalties do not apply to students who missed a lecture or practical class with a valid reason (admission from the dean's office is required).

The student receives the current rating score while reworking the missed classes, for both valid and disrespectful reasons.

Only students who have liquidated their academic debts are allowed to increase the current rating.

**If the student's SR score is 40-59 points**, then he can gain the missing points by eliminating the existing academic debt within the credit week or exam session only with the permission of the dean office.

**If the student's SR score is less than 40 points**, then he is considered as has not mastered the discipline and expelled from the KSMA.

If the discipline is studied over several semesters, then the **average semester rating (ASR)** is calculated, which is the arithmetic average of all semester ratings (SR) and does not exceed 100 points.

If the training is conducted in the form of an interdisciplinary module (eg, module "from the molecule to the cell" and others), then **the rating for interdisciplinary module (RIDM) is calculated**, upon its' completion, which is the sum of all the RDM in the disciplines included in the module, taking into account the indexation of points depending on the volume of the discipline (*see Appendix 4*).

Upon the discipline study completion a student may be rewarded with **bonus points (BP)** for the educational and scientific achievements in the discipline (not more than 10) for:

- participation in the intra -university or inter-university olympiad / conference – 2-4 points;
- participation in the international Olympiad / conference – 5-7 points;
- systematic participation in the scientific circle of the department - up to 2 points
- the availability of publications in a peer-reviewed publication (domestic, foreign) – 3-7 points.

The number bonus score is determined by the department according to the above mentioned criteria depending on the student's achievements (occupied place at the Olympiad or conference, publications in a domestic or foreign publication, etc.).

Final integrated score for all learning activities of the student in the subject is **the Final Rating (FR)**, that is calculated by summing the current rating, bonus points, and the results of final control (exam). The maximum rating for the discipline is 100 points, the threshold score is 60 points.

*The general algorithm for the formation of FR in discipline is presented in Appendices 5 and 6.*

**FR in the discipline ending with credit (zachyot)** is the sum of the ASR score and bonus points (**FR = ASR + BP**).

**FR in the discipline ending with the exam** is the sum of the milestone rating (MR), bonus points and final control/exam (**FR = MR + BP + FC**).

In the case when the **discipline ends with an exam**, a **milestone rating (MR)** is calculated

**Milestone rating (MR)** reflects the accumulated scores in discipline (average semester rating or rating for interdisciplinary module) with weighted coefficient of 0.9 (**MR = 0.9 \* ASR or MR = 0.9 \* RIDM**).

*A student is allowed to take the exam if the MR is at least 54 points.*

**Conditions for exemption from the final control/exam.** A student can be exempted from the exam with 8.6 points for the exam and "excellent" marks on the examination sheet:

- for the discipline, if the sum of points he scored  $MR+BP = 81-100$ , provided that the SR for each semester (if the discipline has a duration of more than one semester)  $\geq 88$  points;
- for an interdisciplinary module, if the sum of points scored by it is  $MR+BP = 81-100$ , provided that the SR for each discipline (included in the module) is  $\geq 88$  points.

If a student extends the credit week in any discipline for a non-respectful reason, *the exemption from all exams is automatically cancel*.

**Students who score sum MR + BP <81 points, must pass the exam.**

*An example of the formation of the final rating for the discipline is presented in Appendix 7.*

**The exam** (oral, testing) is evaluated on a 10-point scale.

In case of receiving the test score below the threshold (less than 6 points) two retakes are permitted.

*At the first retake, the student can get a maximum of 8 points, and the student who retook the exam and his FR score in the discipline was 86 to 100 points, the FR is equated to 85 points and a “good” mark is given.*

In the case of obtaining points for the exam below the threshold (less than 6 points), the student must re-retake it.

*At the second retake, the student can get a maximum of 6 points, and even the student obtained the FR score in the discipline 76 to 100 points, the FR is equated to 75 points and a “satisfactory” mark is given.*

In case of received score at the second retake is below the threshold minimum (less than 6), the rating is “unsatisfactory”. *The score of the second retake is final*, discipline FR is not calculated.

*In case of “failure to attend” the exam, the student is allowed to retake the exam only with the permission of the dean office with indication of the retake date.*

*In the case of a repeated course of study, the maximum exam score of the student does not exceed 8. At the same time, the FR is calculated for him and the following score is given in the exam sheet and the record book:*

- if the FR is in the range from 60 to 85 points - the mark corresponding to these points;
- if the FR is in the range from 86 to 100 points, FR is equal to 85 points and the mark is given "good".

**In the case when the form of FC is a “zachyot”, the MR is not calculated, and the BP are added to the ASR or SR (if the discipline is taught only for one semester) ( $FR = ASR / SR + BP$ ) and this score is recorded in the credit sheet and in the journal as final. A student is considered certified in the discipline if the final rating is not less than 60.**

If the student's FR after summing up all the indicators is more than 100 points, then in record book given 100 points.

*An example of the formation of the final rating by discipline is presented in Appendix 8.*

## Discipline Rating Plan

<b>Discipline Rating Plan 50/50</b>			<b>Credit minimum</b>	<b>Credit maximum</b>
<b>Intradisciplinary Module N</b>	<b>Current rating (CR) 80</b>	<b>Classroom work</b> <ul style="list-style-type: none"> <li>• students' activity in class</li> <li>• oral reply</li> <li>• practical work</li> <li>• task solving</li> <li>• and other</li> </ul>	<b>24</b>	<b>40</b>

### Scoring criteria at classes

Score	Criteria
5	The score is given for a deep understanding of the educational material, for the ability to independently clarify the studied positions, for the logical and literally correctly constructed answer when the student makes no mistakes, knows how to integrate the knowledge gained with knowledge in related academic disciplines.
4	The score is given for the correct assimilation of program material, however, inaccuracies and minor errors are made in the answer both in the content and in the form of constructing the answer.
3	The score is given if the student correctly uses specific terminology, knows the basic, essential provisions of the educational material, but does not know how to explain them, makes individual errors and inaccuracies in the content of knowledge and the form of constructing the answer.
2	The score is given for poor assimilation of the material, and not for lack of knowledge. An unsatisfactory answer shows that the student is familiar with the teaching material, but does not highlight the main points, makes significant errors that distort the meaning of the studied. He transfers information that he remembered from the words of the teacher or from the textbook, but which is not logically processed in his mind, is not brought into the system of scientific principles, arguments.
1	The score is given when the student refuses to answer, or his answer demonstrates a complete lack of knowledge of the educational material.

### Example of converting a five-point system to a 100-point

**Discipline Z has 7 practical classes**

$7 \times 5 = 35$  – the highest possible score = 100%

(equated to 60 points)

$7 \times 3 = 21$  – least possible (passing) point = 60%

(equates to 36 points)

If a student scored **32** points in a journal,

then his CRC will be **54.8**

$$35 - 60$$

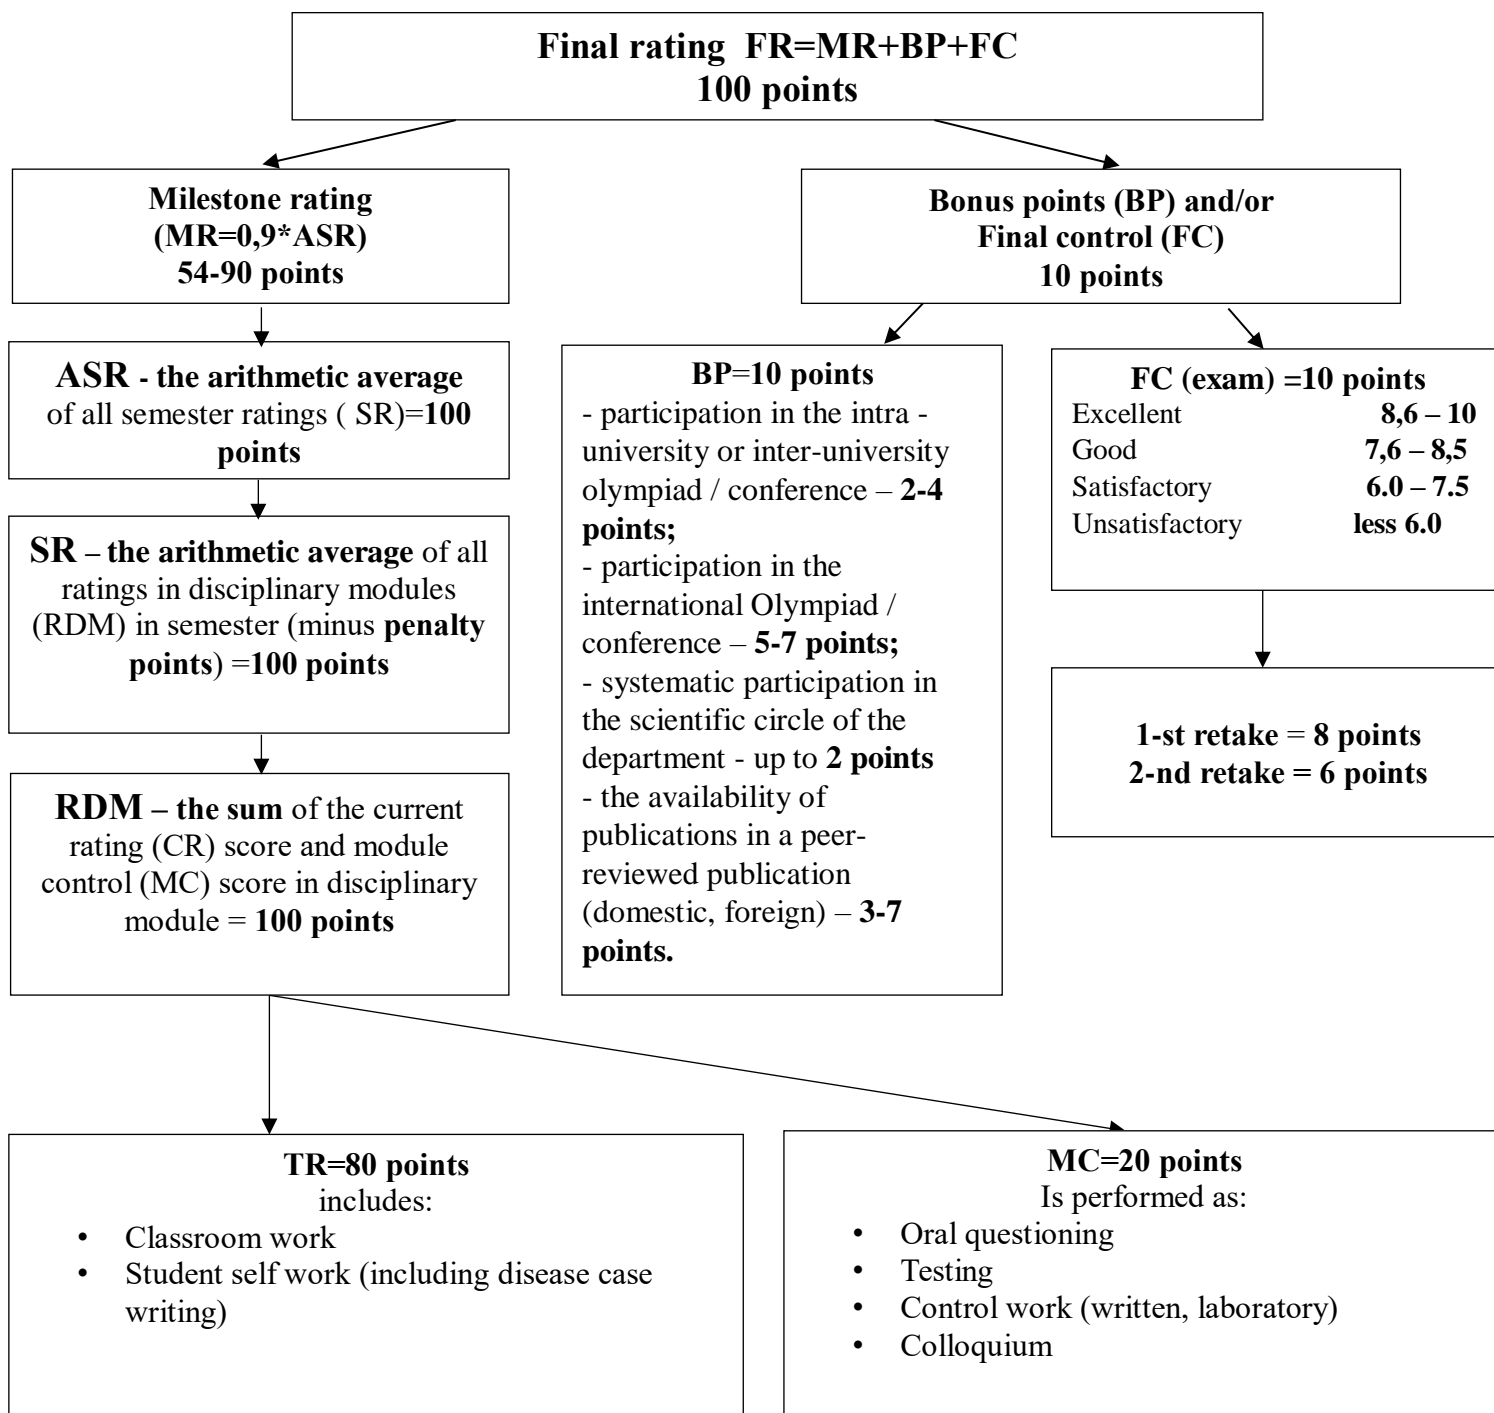

$$32 - x \quad x = 32 \times 60 : 35 = 54,8$$

5 - point	100 - point
35	60
34	58,2
33	56,5
32	54,8
31	53,1
30	51,4
29	49,7
28	48
27	46,2
26	44,6
25	42,9
24	41,4
23	39,4
22	37,7
21	36

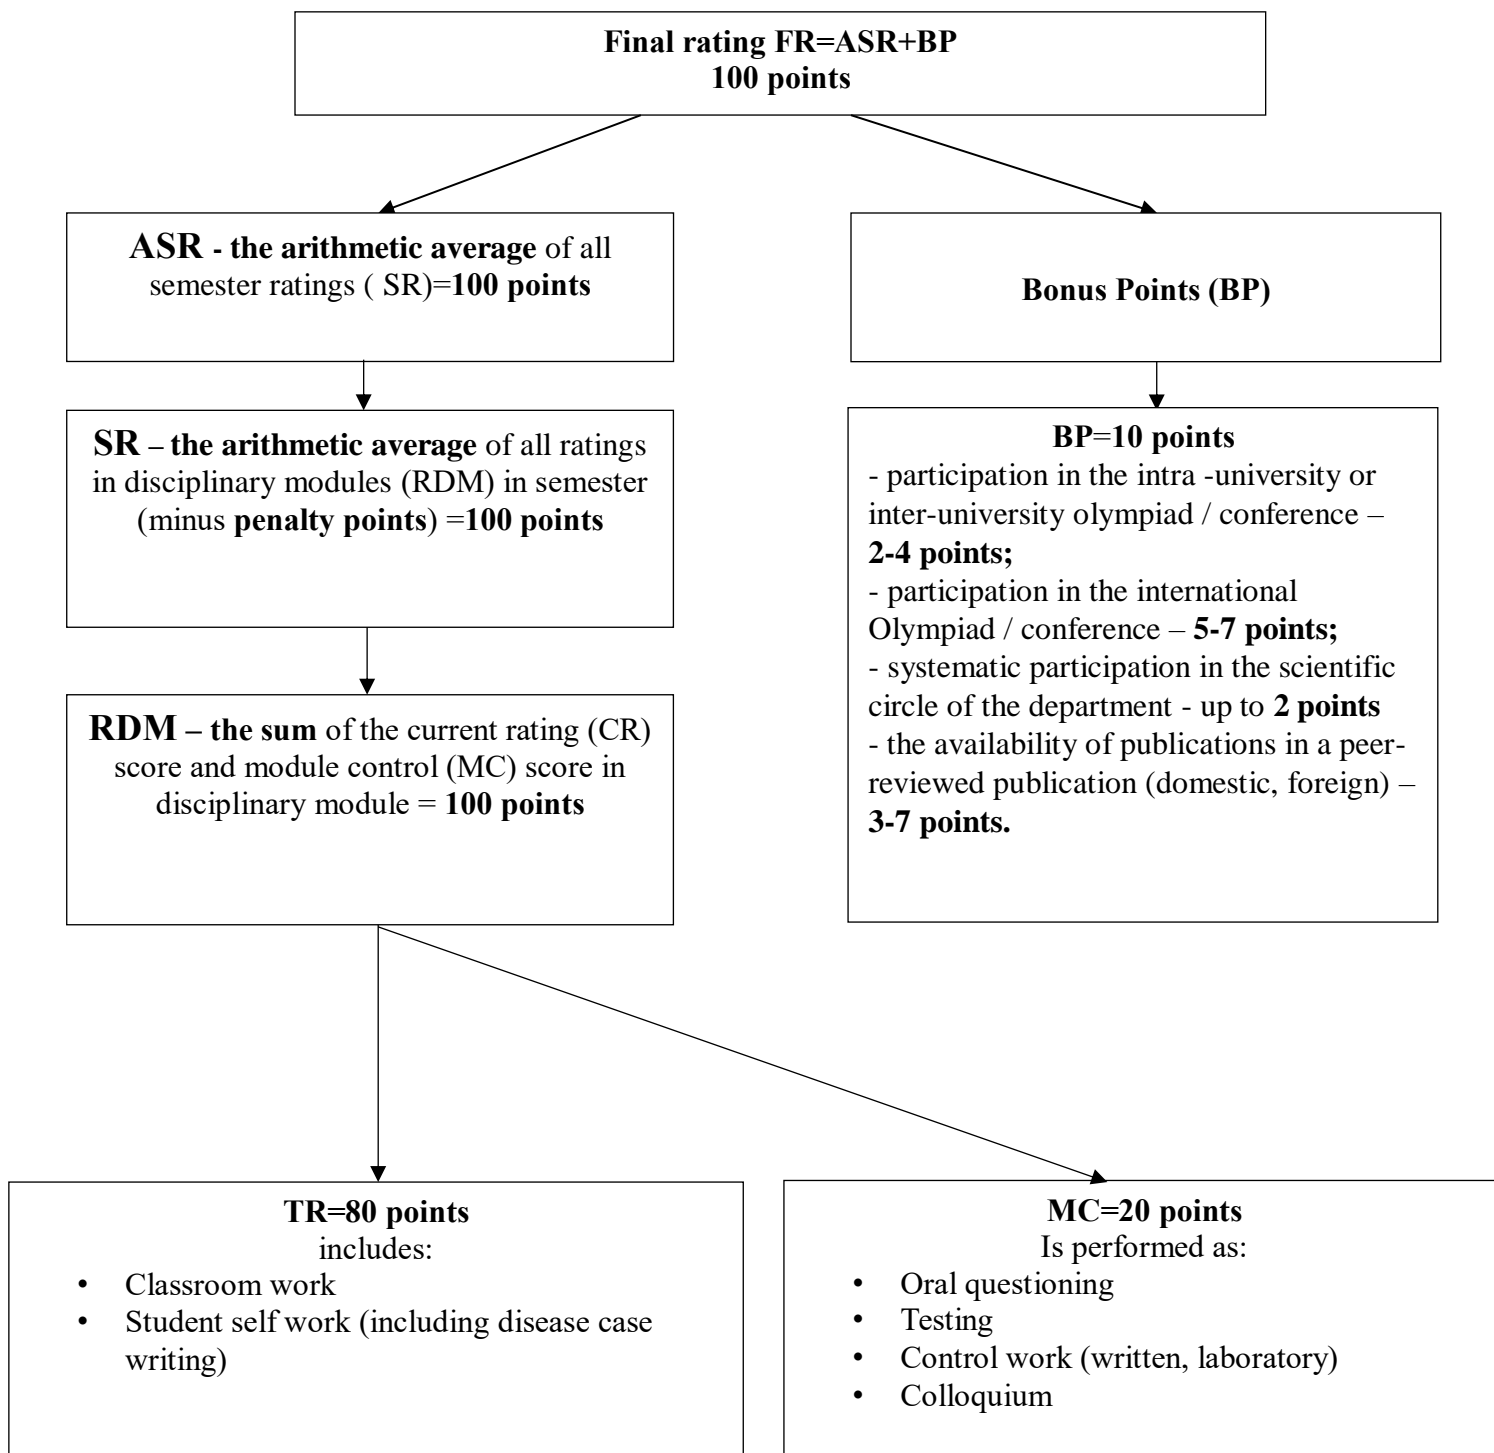

## Score calculation for interdisciplinary module

<b>Discipline</b>	<b>Number of credits</b>	<b>Score</b>	<b>Calculation Index</b>	<b>Final score</b>
<b>Anatomy</b>	3,0	78	<b>0,3</b>	$78 \times 0,3 = 23,4$
<b>Histology</b>	2,0	82	<b>0,2</b>	$82 \times 0,2 = 16,4$
<b>Physiology</b>	2,5	90	<b>0,25</b>	$90 \times 0,25 = 22,5$
<b>Chemistry</b>	1,5	88	<b>0,15</b>	$88 \times 0,15 = 13,2$
<b>Biology</b>	2,2	80	<b>0,22</b>	$80 \times 0,22 = 17,6$
<b><i>Total 93,1</i></b>				

**Discipline FR formation algorithm**  
(if the discipline study completed with exam)

**Discipline FR formation algorithm**  
**(if the discipline study completed with credit/zachyot).**

### Example of calculating a student's rating for exam exemption

Semester rating of student	Average semester rating (ASR)	Milestone rating (MR)	Bonus point	MR+BP
MR <sub>1</sub> =88 MR <sub>2</sub> =92	90	$90 \times 0,9 = 81$	0	$81+0=81$ the student is <b>exempt</b> from the exam
MR <sub>1</sub> =88 MR <sub>2</sub> =88	88	$88 \times 0,9 = 79,2$	2	$79,2+2=81,2$ the student is <b>exempt</b> from the exam
MR <sub>1</sub> = <u>86</u> MR <sub>2</sub> =96	91	$91 \times 0,9 = 81,9$	0	$81,9+0=81,8$ but, the student is <b>not exempt</b> from the exam
MR <sub>1</sub> =88, MR <sub>2</sub> =91,	89,5	$89,5 \times 0,9 = 80,5$	0	$80,5+0=80,5$ the student is <b>not exempt</b> from the exam

### Example of the FR formation (FR=MR+BP+FC) in discipline XXX, ending with exam

Discipline	Semester	Semester Rating (SR)	Average SR (ASR)	Milestone Rating (MR=0,9* ASR)	BP	FC	Final Rating (FR=MR+BP+FC)	Mark
XXX	1-semester	72	75,7	$76 \times 0,9 = 68,1$	2	8,4	79	Good
	2- semester	77						
	3- semester	78						

### Example of the FR formation (FR=MR+BP+FC) in discipline XXX, ending with credit (zachyot)

Discipline	Semester	Semester Rating (SR)	Average SR (ASR)	BP	Final Rating (FR=ASR+BP)	Mark
YYY	1- semester	72	75,7	2	77,7	Good
	2- semester	77				
	3- semester	78
